## Niezupełnie zaćmienie

Strumień świetlny Stellar emitowany jest równomiernie wokół pionowej płaszczyzny oprawy - na zewnątrz i wewnątrz, tworząc efekt wyjątkowego zaćmienia.

## The unusual eclipse

The luminous flux of Stellar is emitted evenly around the vertical plane of the luminaire - outside and inside, creating the effect of the extraordinary eclipse.

## Die ungewöhnliche Eklipse

Der Lichtstrom von Stellar wird gleichmäßig um die vertikale Ebene der Leuchte herum abgestrahlt - außen und innen, wodurch der Effekt einer außergewöhnlichen Finsternis entsteht.

Wall

## Liczy się wnętrze

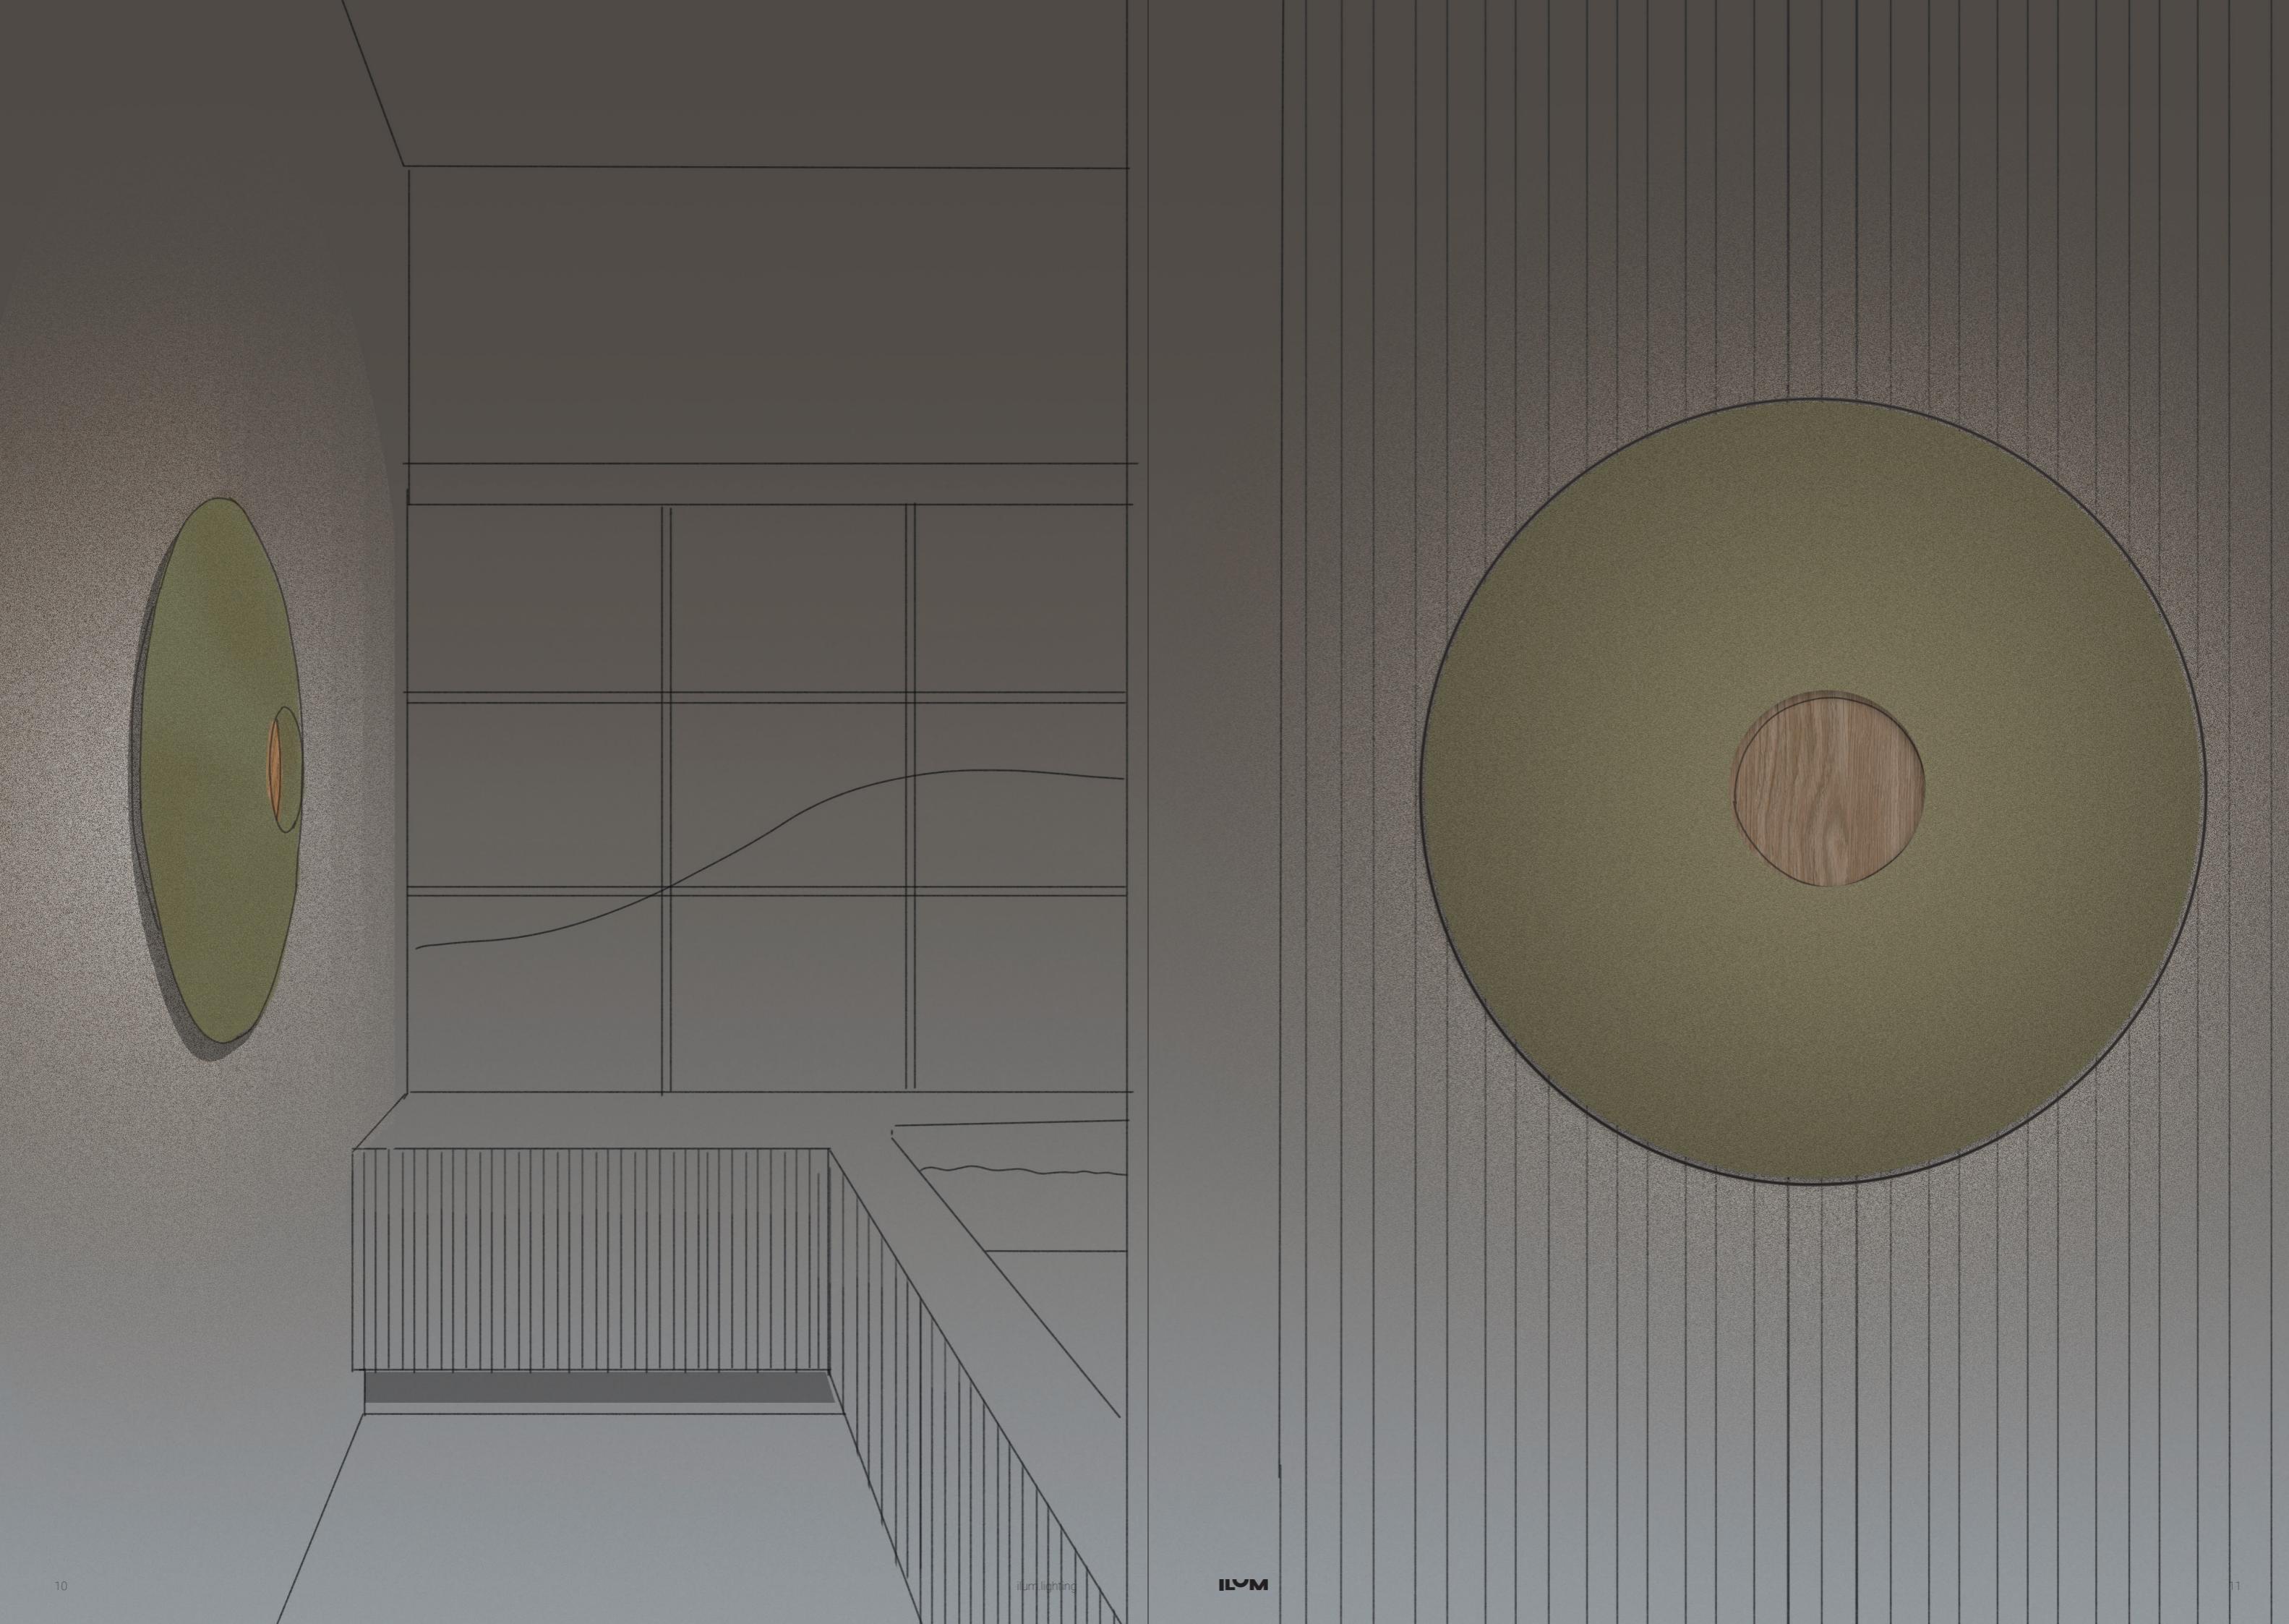

Stellar zapewnia intrugującą poświatę z wnętrza oprawy, gdy światło odbija się od wewnętrznej powierzchni, odstaniając tekstury i kolory materiału znajdującego się wewnątrz.

## The inside counts

The Stellar provides and intriguing glow from within the fixture as light reflects off the inner surface, exposing the textures and colors, of the material framed inside.

## Das Innere zählt

Stellar sorgt für ein faszinierendes Leuchten aus dem Inneren der Leuchte, da das Licht von der Innenfläche reflektiert wird und die Texturen und Farben des Materials im Inneren zum Vorschein kommen.

## Our mission is healthy light.

We create human and environment – friendly solutions: natural, comfortable to the eye, rendering genuine colours. We believe in timeless and universal aesthetics. We design lamps that are minimalist in their form, and which can complement both traditional and modern architecture. To draw up custom designs, we approach each interior from a fresh perspective.

Quality is at the core of our work. All of our products are manufactured in our own factory in Tarczyn, with the help of a team of lighting experts – technology and product engineers. For 20 years, we have completed a plethora of projects, and each of them represents how we understand the culture of light and the way light can be experienced in space. When considering the role of light in contemporary architecture, one cannot disregard the history of Bauhaus. The school, or rather a free, creative collective Light was of the building blocks of architecture in Modernism. In those times, as a result of technological progress electric light became just as important building material as concrete or steel. Shaping the experience of space through artificial light in buildings was an entirely new challenge for Bauhaus architects and designers. Their avant-garde approach to materials and forms, combined with the consolidation of modernist standards in terms of aesthetics and form in the middle of the 20th century, became the foundation for contemporary design.

Today, when looking at infinite numbers of light fixtures and lamps, it is easy to forget that today's lighting culture has its roots in the school of Bauhaus and owe its shape.
